EDITOR'S CORNER

I hope that you enjoy this exciting issue! Pascal H.H. M. Van Lieshout and his colleagues have contributed an article on using the Facial Flex that provides information that anyone using this device should have. Pascal is a well-published author with many journal articles and books to his credit. Jayanti Ray continues to share her research on using orofacial myofunctional therapy techniques with special populations. In last year's issue she shared information on using OM with individuals experiencing cerebral palsy, and this year with dysarthria. We also have a very intriguing perspective from librarian Nick Moore, who has done a review of the literature on habit appliances. IJOM is fortunate to have Robert Mason as our Associate Editor for Dentistry. He has provided some important views for this Editor's Corner. Please feel free to send me you comments on this issue, or your suggestions for future topics.
