A Salute to Twenty-five Years of Excellence and Uphill Battles

Roberta B. Pierce, M.A.T., C.C.C. S.P., C.O.M.

The International Association of Oral Myology was founded in 1972. From the beginning, the purposes of the I.A.O.M. have been:

- To encourage the basic scientific study of orofacial structures, functions, and development.
- To provide information and to develop and expand services concerning orofacial myofunctional disorders.
- To promote professional growth and encourage high professional standards.
- To stimulate the exchange of experience, ideas and professional procedures.
- To provide an effective relationship with members in all agencies and professions that are related to orofacial myofunctional disorders.
- To promote professional training at the college or university level.

We are appreciative of the efforts of all the individuals who have helped the association grow, weather the storms, and achieve respectability and accountability for orofacial myology. This issue of *The International Journal of Orofacial Myology* is dedicated to those members who were willing to take leadership positions in the association:

The position of Managing Editor is vital to the publication and distribution of the *Journal*. The I.A.O.M. sincerely appreciates its Managing Editors: Holly Anson (1979-1981), Richard Barrett (1981-1983), Roberta Pierce (1983-1986), Catherine Jackson (1986-1989 and 1992-1994), Janie Van Reenen (1990-1991) and Paulette Bergounous (1995-1998).

We also appreciate all of the authors and researchers who have made the *I.J.O.M.* possible. The Bibliography in this issue lists all of the articles which have been published in *The International Journal of Oral/Orofacial Myology*.
