Editorial

Partnership for Involvement

As the theme for this year's International Association of Oral Myology annual session implies, this years convention looks like an excellent chance for the areas of Dentistry, Speech Pathology, Dental Hygiene, Psychology, Nursing and Physical Therapy to see their part in "Oral Myology."

Dr. Barnwell has just sent me a copy of the preliminary program and without a doubt, anyone interested in "Myofunctional Therapy," and also interested in a learning experience, will make an all out effort to be in attendance.

The International Association of Oral Myology has as their goals the tasks of education, encouraging research, and the establishment of a Professional Association which will have a significant input regarding its area of interest.

All signs are go. We will be there to learn. Will you?
