EDITOR'S CORNER

IJOM has an abundance of excellent, informative articles in the archives. It is the intention of IJOM staff to begin to reprint many of these articles and make them more accessible.

This issue of IJOM is a composite of some of the most requested articles from past issues. The articles included represent a critical overview of orofacial myology by Bob Mason, a comprehensive article on assessment by Licia Coceani Paskay, information on feeding by Patricia Meyer, and Nick Moore's seminal article on habit appliances.

This issue is dedicated to all the families of IJOM staff, families of the IAOM Board of Directors, and families of members. Families who provide us with an amazing amount of support and understanding of time that goes into our work, research, and dedication to the future of orofacial myology. Thank you all!

Patricia Taylor, M.Ed. COM/SLP
