## SPECIAL ISSUE: CALL FOR PAPERS

### "Contemporary Approaches to Collaborative Management of Ankylofrenula"

The *International Journal of Orofacial Myology and Myofunctional Therapy: Official Journal of the International Association of Orofacial Myology (IJOM)* is currently welcoming articles for consideration of publication in Special Issue on the management of ankylofrenula.

This Special Issue will highlight contemporary approaches to the collaborative management of ankylofrenula and tethered oral tissues (TOTs). The aim is to disseminate scholarly papers addressing the assessment, diagnosis, treatment, and follow-up care of TOTs, including innovative and collaborative approaches to improve health in individuals with restrictive ankylofrenula. The special issue will appeal to healthcare researchers and clinicians to bring together new research on the management of tethered oral tissues from the perspective of interdisciplinary management, and welcomes papers from lactation, bodywork, pediatrics, airway dentistry, otolaryngology, and speech-language pathology.

Please submit your original research, review paper, clinical perspective, tutorial, case reports, or commentaries to the IJOM at <https://ijom.iaom.com/journal/>. The website outlines the scope, article types, policies, guidelines, and ethical publishing. Papers will be peer-reviewed (double-blind) and, if accepted, published incrementally (immediately after acceptance and proofing) from 01 January 2023 to 31 December 2024.

The IJOM has been in continuous circulation since 1975 and is the only journal globally dedicated to orofacial myofunctional disorders and therapy. All articles in the IJOM are **open access** with **no fees** for authors.

For additional requirements or information about this publication, do not hesitate to contact the Guest Editors at [cireas@icaprofessionals.org](mailto:cireas@icaprofessionals.org) or the IJOM's Editor in Chief, Nancy Pearl Solomon, PhD, at [editor.ijom@iaom.com](mailto:editor.ijom@iaom.com).

#### Guest Editors:

Sharon Smart, PhD, CPSP, FHEA  
Lecturer & Speech-Language Pathologist  
School of Allied Health  
Curtin University, Perth, Western Australia,  
Board of Directors, Int'l Consortium of Ankylofrenula  
Professionals (ICAP)  
Co-Chair, ICAP Committee on Interprofessional Research,  
Education and Ankyloglossia Science (CIREAS)  
[cireas@icaprofessionals.org](mailto:cireas@icaprofessionals.org)

Raymond J. Tseng, DDS, PhD  
Pediatric Dentist, North Carolina Tongue Tie Center of Cary  
Adj. Asst Professor, Dept. of Pediatric and Public Health, School of  
Dentistry, University of North Carolina, Chapel Hill, NC  
Board of Directors, Int'l Consortium of Ankylofrenula Professionals  
(ICAP)  
Co-Chair, ICAP Committee on Interprofessional Research,  
Education and Ankyloglossia Science (CIREAS)
